Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed on January 3, 2002 fails to comply with 37 CFR 1.98(a)(1), which requires a list of all patents, publications, or other information submitted for consideration by the Office. It has been placed in the application file, but the information referred to therein has not been considered.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the grill configured to attach to a first motor assembly and a second, larger motor assembly must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. **Claims 1-4** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 7, "the motor assembly" is indefinite and lacks antecedent basis since it is not clear which one of the first and second motor assemblies is addressed in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. **Claims 1, 2, 5-8, and 11-16** are rejected under 35 U.S.C. 102(b) as being anticipated by **Chiang (US 5,035,398)**.

Chiang discloses in Figures 2-5 invention as claimed: a first motor endshield having a plurality of attachment points 244, a plurality of second openings and bosses 244a for attachment to grill 21, and fasteners 25. The mounting steps of connecting and using the disclosed features together are inherent to the disclosed structure.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. **Claims 3, 4, 9, 10, 17, and 18** are rejected under 35 U.S.C. 103(a) as being unpatentable over **Chiang (US 5,035,398)**.

Chiang discloses the claimed invention except for the self-tapping fastener or the self-clinching nut. It would have been an obvious matter of design choice to design the end shield and to provide well known in the art self tapping fastener or the self clinching nut (Re US Patent 3,693,237 to Grube and 5,905,230 to Marik for the purpose of reducing the cost of the shield installing the end shield to sheet material, since applicant has not disclosed that these features solve any stated problem or is for any particular purpose and it appears that the invention would perform equally well with fastener and threaded hole system.

Response to Arguments

9. Applicant's arguments filed on January 3, 2002 have been fully considered but they are not persuasive.

Examiner upholds the rejection of drawings since neither drawings or specification particularly address or identify the first motor assembly being attached to the motor assembly by the plurality of points and the grill being attached to the first or the second larger motor assembly by the plurality of openings. Examiner respectfully traverses applicants claim that such a sketchy disclosure will be sufficient for one of ordinary skills in the art to use the disclosed method.

Applicant's arguments with respect to claims 1, 5, and 11 have been considered but are moot in view of the new ground(s) of rejection.

Examiner respectfully traverses applicant's arguments with respect to claims 3,4, 9, 10, 17, and 18.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992).

In this case, the self tapping fasteners are well known in the art and since applicant has not disclosed that these features solve any stated problem or are for any particular purpose, their use does not carry any novelty or unique purpose.

Prior Art

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Communication

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph Waks whose telephone number is (703) 308-1676. The examiner can normally be reached on Monday through Thursday 8 am to 5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nestor R Ramirez can be reached on (703) 308-1371.
